Hi David,

I want to help you by taking action in BMX for your orders.

Here's RWP1262 Quotation.

1. Please check it and confirm accuracy.
2. Let me know of any discrepancies, measures are correct and price is correct.
3. After you confirm, I will check with Financial Department about the credit.
4. If Financial Department confirms open terms, I will proceed to MFG.
5. Once completed, we will ask you for shipping instructions.

Thanks,

KR

Hi David,

Thanks for your message.

We are printing both workorders and doing a final check this week – the old workorder and the BMX workorder comparison.

If we are going forward in production, we need your PM to follow the steps so the order is tagged properly – guiding each step with purpose.

Can you have your PM contact with me?

Thanks,

KR

That order was placed several weeks ago and its on the Burlington RS Schedule. I have no idea if the Solatech quote, or the BMX quote is being used for production. I entered the entire order into both systems.

If they are with the status ORP, should they not be moved to Deposit Hold so account can review? RWP1189 is a David Storm job. [@David Storm](#) please update Kathleen on this order.

Hi Mark,

Wonderful! Thanks for getting the Job Status changed from Lead/Quote to Order for most. Take a look at RWP1189.

And we are trying to get these orders printed to mfg. Most are ORP = Order Review Pending.

Can you please ask your team to update the order status ?

Hi Mark,

All the below need your PM attention. Please check.

JOB STATUS – change to ORDER

ORDER STATUS – change to CONFIRMED if an only if the customer PO and the financial department PI is a match and uploaded to the system.

Our MFG team cannot print the wororders in current job status/order status. This is a crutial step in releasing orders to production. We have to have these checks and balances performed before we issue the workorder to production floor.

Additionally – RWP1269 is DEPOSIT HOLD. We cannot produce this order until financial department releases the HOLD.

Thanks,

KR

Hello Kathleen,

Regarding the projects referenced as RP1175, RWP1199, and RWP1205, their status has been changed to Order Confirmed, and their respective production due dates have been recorded.

RWP1205: It has an installation date of 11/01/2025; its production due date was recorded 2 weeks in advance, even though its manufacturing will be completed on 02/28/2025.

RWP1199: It has an installation date of 03/28/2025; its production due date was recorded 2 weeks in advance, even though its manufacturing will be completed on 02/28/2025.

RP1175: It has an installation date of 02/20/2025; since its production due date was already overdue, it was recorded for 02/26/2025, which is the actual manufacturing date.

Please let me know if I need to take any additional action or make any corrections.

Thanks,

Oscar Dussan.
