Blackout Fabric Face Direction	Vertical Stripe Direction Pattern To Be Visible Inside The Unit
Blackout Fabric Face Direction	Vertical Stripe Direction Pattern To Be Visible Inside The Unit
Notes	

**Window Treatment**

- Site conditions & dimensions to be verified by field measurement prior to production.
- Any questions that arise about specifications in relation to field verification are to be brought to the designers attention for solution/approval.
- 48" clear acrylic wand mounted on the front of the leader. Provide ADA wand in ADA units that do not require motorization.
- Vertical pattern match at seams and both panels of window treatment. Place vertical seams behind pleats, never on the front side of a pleat.
- Bottom hem of sheers to include weights or beaded chain weight, stitched into place to prevent slippage and fully concealed.

**Special Instructions:**

Must meet or exceed WVO FF&E Performance Specifications - Q4 2022 - 62.0 WINDOW TREATMENT FABRICATION, DRAPERY AND SHEERS

Notes

**Window Treatment**

- Site conditions & dimensions to be verified by field measurement prior to production.
- Any questions that arise about specifications in relation to field verification are to be brought to the designers attention for solution/approval.
- 48" clear acrylic wand mounted on the front of the leader. Provide ADA wand in ADA units that do not require motorization.
- Vertical pattern match at seams and both panels of window treatment. Place vertical seams behind pleats, never on the front side of a pleat.
- Bottom hem of sheers to include weights or beaded chain weight, stitched into place to prevent slippage and fully concealed.
