Please see the install schedule below. The phases in green are remaining to install and we should be complete by 1/27/26.

Currently, we have been asked to include a LOT of info in the status notes field and on some jobs it is a jumble of info because everyone is using it and it's not being updated regularly.

For this reason - it may be best to get that info to you by just getting the install schedule to you and not trying to add it to status notes. Will this work for you?

What's the status of the Install?

How much is completed to-date? When is completion estimated?

Ember,

The date we started has passed, yes. I am not sure what you mean? What info are you asking for in the status note?
