

Custom Feature List - Reuther

Montag, 4. März 2024

- display custom fabric designations- We have a customer who operates a large online shop and uses different names for our colors, so exclusively for this customer in the order confirmation, our color "B640" should be called "JR404", but our color number (here: B640) should be stated in the data for our production.
- Integration for ELO Archive, Barcodes for it on each template
- Integration for Sage or Datev with (at least once a day) daily sync (included in the accounting software integration for 1200€ probaly?)
- Square meter pricing for some customers and selected products, but normal prices for other customers
- One invoice for different orders for the same customer (collected invoices)
- Barcode Scanning for curtain cleaning with implementation for our existing object data
- Feature for alternative items which are not included in the total offer ammount
- Can subtotals be inserted if, for example, the customer wants separate prices for blinds and vertical blinds in one quote
- Barcodes for our production machines on the worksheets (vertical blinds)
